

.....
Expense Analysis
.....

Challenge:

In doing a review engagement for a large manufacturing client, we noted that telephone expenses had been steadily growing for the past several years. The expenses were increasing greater than sales volume.

Solution:

The client was experiencing increasing telephone costs.

Benefits:

The review team pointed this out to the client and worked with them to locate a knowledgeable consultant. The consultant was able to determine that the client was being overcharged and obtained refunds on their behalf. Additionally, the reduction in cost netted the client approximately \$50,000 in annual savings.
